

## AccuBond™ Features:

- UNLIMITED COLORS
- INTERIOR/EXTERIOR TWO TONE COLOR OPTION
- HIGH ENERGY SAVINGS
- NO MAINTENANCE
- 55 YEAR WARRANTY
- WON'T FADE OR WARP

## Color, Energy Savings and Low Maintenance

Jantek's product development team has engineered a revolutionary new process for bonding color pigmentation to vinyl window and door lineal. The AccuBond™ formula and process is specifically engineered to coat PVC vinyl with color that will last a lifetime. The formulation contains large amounts of ultra-violet inhibitors that eliminate concerns about warping, flaking, peeling and fading. So there's no maintenance required. Jantek Industries developed AccuBond Vinyl Coloring process to allow the same unconditional 55-year non-prorated warranty as our other products.

AccuBond gives the consumer the ability to "two tone" windows (e.g. bronze exterior and white interior). With AccuBond™ consumers who want color choices do not have to settle for high maintenance, energy inefficient Wood or Aluminum windows and doors.
